DETAILED ACTION

It is noted that this action does not treat the proposed amendment discussed in the interview of 11/6/03 (paper no. 9).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 20-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cochran et al in view of Egerstrom.

Cochran et al discloses a skid steer vehicle having a quick release mounting member 10 for detachably connecting a base frame (of 18) to the vehicle. The base frame is provided with top retention plates 20, lower slotted retention plates 24, and locking pins 38.

Cochran does not disclose providing a skid steer vehicle with a hose reel.

Egerstrom teaches providing a vehicle with a hydraulic reel comprising a base frame 18,20, a reel base 76 including upright members 84, a reel 28 holding a length of hose 44, and a hydraulic motor 62. The reel 28 is

supported by a hollow axle 38 having a hose outlet (portion of hose 44 between axle 38 and jointing means 50). The reel has an opening 46 through which the hose passes for connection to the hose outlet. See Fig. 2. One end of the axle is sealed. A rotary union 60 attached to the other end. A pair of bearings (see claim 3 of Egerstrom) supports the axle on the reel base. The apparatus includes hose guide 120 one end of which extends from the reel base. A pulley 148 is mounted on the other end.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Cochran et al with a base frame mountable to the quick release mounting having a hose reel and hose guiding apparatus as taught by Egerstrom to permit the transport of a hose reel using the skid steer vehicle of Cochran et al in addition to the other handling devices which the vehicle of Cochran et al is capable of transporting, thus permitting the hose reel to be carried over terrain more suited to the use of a skid steer vehicle. It would have been further obvious to drive the hydraulic motor with hydraulic oil from the skid steer vehicle to eliminate the need for a duplicate pump.

With regard to claims 24, 31, and 37, it would have been obvious to provide a hydraulic valve for controlling flow of hydraulic oil to the hydraulic motor 62, such valves being well known in the art for controlling operation of motors.

With regard to claims 27 and 34, it would have been obvious to use roller bearings to support the reel since it is old and well known to use roller bearings to support rotary shafts with minimal friction and wear.
